

1

00:00:00,166 --> 00:00:03,733

Stabilization points where the wounded Ukrainian soldiers arrive

2

00:00:03,733 --> 00:00:06,200

allocated a few kilometres from the front line

3

00:00:06,200 --> 00:00:09,366

soldiers are taken from the Battlefield on vacation

4

00:00:09,366 --> 00:00:13,200

ambulances and regardless of the severity of their injuries

5

00:00:13,200 --> 00:00:15,366

they are brought to the Stabilization center

6

00:00:15,366 --> 00:00:18,466

here Milto doctors immediately begin to work

7

00:00:22,333 --> 00:00:23,900

if we have critical wounds

8

00:00:23,900 --> 00:00:26,700

then we can already know where to take them

9

00:00:26,700 --> 00:00:30,566

this is our number one word for such more seriously wounded

10

00:00:30,566 --> 00:00:33,366

we have here breezing equipment eventulator

11

00:00:33,366 --> 00:00:37,000

there is a possibility of monetoring oxygen concentrators

12

00:00:37,000 --> 00:00:39,200

suction devices special heating

13

00:00:39,200 --> 00:00:40,533

because they are bled

14

00:00:40,533 --> 00:00:43,566

they are always cold we warm them up a bit

15

00:00:43,766 --> 00:00:45,866

the main cause of silver injurious

16

00:00:45,866 --> 00:00:48,100

doctors say most often trap nail

17

00:00:48,100 --> 00:00:51,066

wounds often fighters with cardiocarrest

18

00:00:51,066 --> 00:00:55,466

and broken limbs are handed over to doctors

19

00:00:55,500 --> 00:00:57,166

there are times when they bring

20

00:00:57,166 --> 00:01:00,333

already trying to resociate 8 in the car

21

00:01:00,333 --> 00:01:03,400

it happens that the heart stopped three minutes before

22

00:01:03,400 --> 00:01:04,366

arriving to us

23

00:01:04,366 --> 00:01:06,866

and having already shifted it here

24

00:01:06,866 --> 00:01:09,800

we carry out cardiopulmonari

25

00:01:09,800 --> 00:01:11,966

we carry out cardiopulmonari

26

00:01:11,966 --> 00:01:14,300

resociation right on the table

27

00:01:14,300 --> 00:01:15,100

and we work

28

00:01:15,100 --> 00:01:18,466

with a slightly different algorithm from the battlefield

29

00:01:18,466 --> 00:01:22,200

doctors say the fighters are brought with a large loss of blood

30

00:01:22,200 --> 00:01:24,800

in order to make a transfusion right now

31

00:01:24,800 --> 00:01:28,566

plasma supplies are always taught in this medical center

32

00:01:28,566 --> 00:01:32,000

it is also very important doctors say after stabilizing

33

00:01:32,000 --> 00:01:33,766

their condition of a serviceman

34

00:01:33,766 --> 00:01:37,700

try to preserve his modern functions if the limb are damaged

35

00:01:39,200 --> 00:01:41,733

we must do our best to remove the tourniquets

36

00:01:41,733 --> 00:01:44,600

because the longer the tourniquet is on the limbs

37

00:01:44,600 --> 00:01:47,933

the less time it takes to restore the blood supply therefore

38

00:01:47,933 --> 00:01:50,966

we try either to temporarily bypass the vessels

39

00:01:50,966 --> 00:01:53,766

or to revise and treat damage to vessels

40

00:01:53,766 --> 00:01:55,933

so that there is no bleeding decide

41

00:01:55,933 --> 00:01:59,166

as much as possible in tactics to transfer the victim

42

00:01:59,166 --> 00:02:00,400  
without a tourniquet

43

00:02:01,900 --> 00:02:04,533  
the work of military doctors in stabilization

44

00:02:04,533 --> 00:02:07,733  
Santa as in my opinion is in full swing however

45

00:02:07,733 --> 00:02:09,733  
the doctors assured us today

46

00:02:09,733 --> 00:02:13,300  
the intensity of the arrival of wounded servicemen is much lower

47

00:02:13,400 --> 00:02:13,933  
more recently

48

00:02:13,933 --> 00:02:16,400  
medical workers say about a hundred people

49

00:02:16,400 --> 00:02:18,900  
a day were brought here from the battlefield

50

00:02:18,900 --> 00:02:22,000  
near Bachmut they worked almost without sleep now

51

00:02:22,000 --> 00:02:24,566  
enemy fire attacks are not so active

52

00:02:24,566 --> 00:02:28,500  
but still they print passions with varying degrees of shell

53

00:02:28,500 --> 00:02:29,933  
shock and other injuries

54

00:02:30,300 --> 00:02:31,966  
接近过两三小时之后

55

00:02:32,300 --> 00:02:34,000  
you don't have a fragment here

56

00:02:34,000 --> 00:02:37,300  
it's some things that flew in front outside it's okay

57

00:02:37,300 --> 00:02:41,266  
it's okay friend said he didn't understand how he was wounded

58

00:02:41,266 --> 00:02:44,800  
he says that he practically didn't experience pain

59

00:02:44,866 --> 00:02:48,533  
he only regrets that the fragment pierced the uniform

60

00:02:49,766 --> 00:02:51,400  
how do you feel那么晚了

61

00:02:51,733 --> 00:02:53,333  
normal good mended

62

00:02:53,333 --> 00:02:56,866  
we will continue on to beat the enemy despite their workload

63

00:02:56,866 --> 00:02:59,500  
the doctor salved Assad separate assault

64

00:02:59,500 --> 00:03:03,133  
brigard assured that they have no right to make a mistake

65

00:03:03,133 --> 00:03:06,066  
therefore they tried not to complain about paddage

66

00:03:08,300 --> 00:03:09,600  
feel exhausted Todd

67

00:03:12,066 --> 00:03:13,566  
we feel it happens

68

00:03:13,566 --> 00:03:14,800

because in principle

69

00:03:14,800 --> 00:03:16,166

we work here twenty four

70

00:03:16,166 --> 00:03:18,733

twenty four and on a permanent basis but

71

00:03:18,733 --> 00:03:21,866

what is the way out as long as we do what we do

72

00:03:21,900 --> 00:03:24,066

reported by an ancient khalianahrama

73

00:03:24,066 --> 00:03:25,066

uat been used

译文:

1

00:00:00,166—比;00:00:03,733

受伤的乌克兰士兵到达稳定点

2

00:00:03,733—比;00:00:06,200

分配到离前线几公里的地方

3

00:00:06,200—比;00:00:09,366

士兵们被带离战场去度假

4

00:00:09,366—比;00:00:13,200

救护车，不管他们伤势有多严重

5

00:00:13,200—比;00:00:15,366

他们被带到稳定中心

6

00:00:15,366—比;00:00:18,466

在这里，医生们立即开始工作

7

00:00:22,333—比;00:00:23,900

如果我们有致命伤

8

00:00:23,900—比;00:00:26,700

那我们就知道该带他们去哪了

9

00:00:26,700—比;00:00:30,566

这是我们用来形容伤势严重的人的首选词

10

00:00:30,566—比;00:00:33,366

我们这里有通风设备，风机

11

00:00:33,366—比;00:00:37,000

有可能监测氧气浓缩器

12

00:00:37,000—比;00:00:39,200

抽吸装置专用加热

13

00:00:39,200—比;00:00:40,533

因为他们流血了

14

00:00:40,533—比;00:00:43,566

它们总是冷的，我们给它们热一下

15

00:00:43,766—比;00:00:45,866

银伤的主要原因

16

00:00:45,866—比;00:00:48,100

医生说最常见的是夹指甲

17

00:00:48,100—比;00:00:51,066

伤口常伴有心脏骤停

18

00:00:51,066—比;00:00:55,466

断肢被交给医生

19

00:00:55,500—比;00:00:57,166

有时他们会带来

20.

00:00:57,166—比;00:01:00,333  
已经在车上试着联系了

21  
00:01:00,333—比;00:01:03,400  
碰巧心脏在三分钟前停止跳动了

22  
00:01:03,400—比;00:01:04,366  
到达我们这里

23  
00:01:04,366—比;00:01:06,866  
已经把它移到了这里

24  
00:01:06,866—比;00:01:09,800  
我们进行心肺复苏术

25  
00:01:09,800—比;00:01:11,966  
我们进行心肺复苏术

26  
00:01:11,966—比;00:01:14,300  
就在桌子上

27  
00:01:14,300—比;00:01:15,100  
我们工作

28  
00:01:15,100—比;00:01:18,466  
用的算法和战场稍有不同

29  
00:01:18,466—比;00:01:22,200  
医生们说，这些战士被送来时大量失血

30.  
00:01:22,200—比;00:01:24,800  
为了马上输血

31  
00:01:24,800—比;00:01:28,566  
这个医疗中心总是教授血浆供应

32  
00:01:28,566—比;00:01:32,000

医生说，在稳定之后，这也很重要

33

00:01:32,000—比;00:01:33,766

他们的服役状态

34

00:01:33,766—比;00:01:37,700

如果跛行受损，尽量保持他的现代功能

35

00:01:39,200—比;00:01:41,733

我们必须尽力把止血带拿掉

36

00:01:41,733—比;00:01:44,600

因为止血带在四肢上的时间越长

37

00:01:44,600—比;00:01:47,933

恢复血液供应的时间就越短

38

00:01:47,933—比;00:01:50,966

我们要么尝试暂时绕过血管

39

00:01:50,966—比;00:01:53,766

或修复和治疗血管损伤

40

00:01:53,766—比;00:01:55,933

这样就不会流血了

41

00:01:55,933—比;00:01:59,166

尽可能多地运用战术转移受害者

42

00:01:59,166—比;00:02:00,400

没有止血带

43

00:02:01,900—比;00:02:04,533

米勒医生的工作是稳定

44

00:02:04,533—比;00:02:07,733

然而，在我看来，圣诞老人正如火如荼地进行着

45

00:02:07,733—比;00:02:09,733

医生今天向我们保证

46

00:02:09,733—比;00:02:13,300

受伤军人到达的强度要低得多

47

00:02:13,400—比;00:02:13,933

最近

48

00:02:13,933—比;00:02:16,400

医务人员说大约有100人

49

00:02:16,400—比;00:02:18,900

从战场上带回来一天

50

00:02:18,900—比;00:02:22,000

在巴克穆特附近，他们现在几乎不睡觉

51

00:02:22,000—比;00:02:24,566

敌人的火力攻击不那么活跃

52

00:02:24,566—比;00:02:28,500

但他们仍然用不同程度的外壳印刷激情

53

00:02:28,500—比;00:02:29,933

休克和其他伤害

54

00:02:30,300—比;00:02:31,966

接近过两三小时之后

55

00:02:32,300—比;00:02:34,000

这里没有碎片

56

00:02:34,000—比;00:02:37,300

有一些东西在前面飞在外面没事的

57

00:02:37,300—比;00:02:41,266

没关系，朋友说他不明白自己是怎么受伤的

58

00:02:41,266—比;00:02:44,800

他说他几乎没有感觉到疼痛

59

00:02:44,866—比;00:02:48,533

他只后悔碎片刺穿了制服

60

00:02:49,766—比;00:02:51,400

你感觉怎么样那么晚了

61

00:02:51,733—比;00:02:53,333

正常好补

62

00:02:53,333—比;00:02:56,866

尽管敌人工作量很大，我们还是要继续打败他们

63

00:02:56,866—比;00:02:59,500

这名医生挽救了阿萨德的另一次袭击

64

00:02:59,500—比;00:03:03,133

Brigard保证他们没有犯错的权利

65

00:03:03,133—比;00:03:06,066

因此，他们尽量不抱怨车费

66

00:03:08,300—比;00:03:09,600

感到筋疲力尽托德

67

00:03:12,066—比;00:03:13,566

我们感觉它发生了

68

00:03:13,566—比;00:03:14,800

因为原则上

69

00:03:14,800—比;00:03:16,166  
我们24小时在这里工作

70  
00:03:16,166—比;00:03:18,733  
24个，而且是永久的，但是

71  
00:03:18,733—比;00:03:21,866  
只要我们做我们该做的，出路在哪里

72  
00:03:21,900—比;00:03:24,066  
由古代年卡利亚那罗摩记载

73  
00:03:24,066—比;00:03:25,066  
用过什么？
